Why Now, More Than Ever, You Need a Massage

While you may be tempted to trim your wellness budget when economic times are tough, now more than ever, massage should play a role in reducing stress and strengthening the health of Americans.

When you feel your best, you are more likely to be able to face the challenges difficult times present. With greater health and peace of mind, you can face difficulties with poise, clarity of purpose, and strengthened emotional reserves.

Truly, massage is more than a luxury--it's a vital part of self-care that has a positive ripple effect on us as we work, play, relax, live life, and care for others.

reducing the risk of stress-related illnesses, massage also boosts immunity, helping you fight colds, flu, and other viral infections.

Following is a sampling of a long list of bodywork benefits:

- EASE ANXIETY.
- REDUCE THE FLOW OF STRESS HORMONES.
- IMPROVE SLEEP.
- BOOST THE IMMUNE SYSTEM.
- BUILD ENERGY LEVELS.
- REDUCE FATIGUE.
- FOSTER CONCENTRATION.
- INCREASE CIRCULATION.
- DEVELOP SELF-ESTEEM.
- REDUCE FREQUENCY OF HEADACHES.
- RELEASE ENDORPHINS.

Massage induces a sense of grounding and calm, helping you face challenges with ease.

Invest In Yourself, Invest in Those You Love

In economically challenging times, it is vital to invest in preventative health care. The last thing you want is to get sick, have to take time off of work, and pay expensive medical bills. Staying healthy means maintaining your ability to take whatever life has to throw at you. Besides lowering stress levels and, in turn,

And if you think about it, massage is an excellent value. The price of massage has remained stable in recent years, as the cost of movies, dining out, and sports events has risen. Which of these has the power to improve your health and your outlook on life?

The positive effects of regular massage can have far-reaching effects in many areas of your life.

At Home

Massage therapy will also help families under stress create healthier households with clear-thinking and more relaxed moms and dads. Children are very sensitive and often pick up on tension in a household; parents who are taking care of themselves are more likely to be better caregivers and provide a sense of security to their kids. This goes for caregivers of aging parents and other family members.

At Work

The health benefits of massage can help forestall illnesses and lost work time, especially when you may be asked to produce more with fewer resources. Decision-making skills will be better and your performance is likely to be improved with a clear focus and more energy.

A hint for the boss: Research shows employees exhibit less stress and improved performance when given twice-weekly, 15-minute massages in the office!

For Health Conditions

Those with already existing health conditions can continue to reap benefits in the following ways. And proactively caring for health through massage may help reduce costly doctor visits and use of prescription and over-the-counter medications.

Research shows:

- Massage can reduce sports-related soreness and improve circulation--good to know when you may be exercising more to reduce stress.

- Deep-tissue massage is effective in treating back pain, arthritis, osteoarthritis and fibromyalgia. Fibromyalgia patients receiving massage also have less pain, depression, anxiety, stiffness, fatigue, and sleep problems.

- Massage reduces symptoms of carpal tunnel syndrome.

- Oncology patients show less pain, fatigue, nausea, anxiety and depression following massage therapy.

- Stroke patients show less anxiety and lower blood pressure with massage therapy.

- Massage therapy is effective in reducing postsurgical pain.

- Alzheimer's patients exhibit reduced pacing, irritability and restlessness after neck and shoulder massage.

- Labor pain. Massage during labor appears to reduce stress and anxiety, relax muscles and help block pain. Some medical professionals believe massage also reduces tearing, shortens labor, reduces the need for medication and shortens hospital stays.

- Preterm babies receiving massage therapy gain more weight and have shorter hospital stays than infants not receiving massage.

- Massage is beneficial in reducing symptoms associated with arthritis, asthma, high blood pressure, and premenstrual syndrome.

There is now a body of research to support the benefits listed above. But there's no greater testimonial than the person who is a regular receiver of massage. The first-hand experience of bodywork clients largely echo the same sentiment: bodywork enhances quality of life, and the return on your investment is great.

While bodywork feels like a luxurious mini-vacation, and you should by all means enjoy it, there is an actual physical need for massage. Maintaining a regular massage schedule will help you operate at your peak level--whether it be at work, at home, or at play. Invest in yourself, and book a massage today.

Massage is one of the few things that provide so much pleasure while improving your health.

The Art of Bathing

Simple Recipes to Soothe Mind and Body

From bubble baths to essential oils to Dead Sea salts, prepared bath products are designed to enhance a bathing experience, but they can be expensive. Instead of spending the extra money on special bath products, try one of these natural, simple bath recipes with ingredients you probably already have in your cupboard or refrigerator.

Epsom Salts

ADD 2 CUPS EPSOM SALTS TO BATH WATER.

Magnesium sulfate, or Epsom salts, has been used for centuries as a folk remedy, and research now confirms its numerous benefits. The second most abundant element in human cells and a crucial component for bone health, magnesium is also needed for muscle control, energy production, and the elimination of toxins. Magnesium eases stress, aids sleep, and improves concentration while reducing inflammation, joint pain, and muscle cramps. Sulfates help to flush toxins from the body, prevent or reduce headaches, and even improve brain function.

Most American diets are deficient in magnesium. However, one of the best ways to boost dietary intake is by bathing in Epsom salts, which are readily absorbed through the skin.

Milk

ADD 2-4 CUPS MILK OR BUTTERMILK TO BATH WATER.

Rich in calcium, protein, and vitamins, milk replenishes the skin, while lactic acid found in milk acts as a natural exfoliant. A member of the alpha hydroxy acid family, lactic acid breaks the glue-like bonds between the outer layer of dead skin cells. Soak in a milk bath for 20 minutes, then gently scrub skin with a loofah or washcloth.

Honey

ADD 1/4 CUP HONEY TO BATH WATER.

A fragrant, natural humectant, honey helps skin attract and retain moisture. Its antibacterial and anti-irritant properties make it an ideal cleansing and soothing additive to a warm bath.

Turn your home bath into a spa experience.

Hemp Nutrition

Set Aside Stereotypes For This Wonder Food

Shelley Burns, N.D.

While hemp has often been negatively associated with marijuana, it actually has very little mind-altering tetrahydrocannabinol (THC) in it--just 0.3 percent in hemp, compared with the 3-15 percent found in marijuana. And in parts of the world, it has been used to make clothing, bedding, and rope thousands of years.

Now more recently--hemp and its good balance of antioxidants, carbohydrates, fats, and proteins--is being viewed as a health-promoting, disease-preventing food. Its derivatives include hemp oil, hemp butter, hemp protein powder, and newest of all, hemp milk. Hemp milk is positioned to compete with other non-dairy alternatives like soy, rice, and almond milk.

HEMP'S POWERFUL PROPERTIES PROVIDE A NUMBER OF BENEFITS:

- Its antioxidant content counteracts environmental toxins.
- Its carbohydrates help increase energy, improve endurance performance during exercise, and keep the mind at peak performance.
- Hemp seeds have more dietary protein than soybeans, meat, fish, chicken, cheese, and milk. Hemp protein has the added benefit of being gluten-free.
- Hemp contains all nine essential amino acids, the building blocks of cells, antibodies, muscle tissue, and enzymes.

- Hemp is loaded with essential fatty acids (EFAs), which are required for maintaining good neurological, digestive, and skin health.
- Hemp has a low-cholesterol content and a high content in natural phytosterols that also reduce cholesterol levels.
- Hemp is helpful in preventing conditions such as Alzheimer's disease, arthritis, and asthma.
- Hemp is also good for the planet. As a low-maintenance plant that grows just about anywhere, needs little or no pesticides, and is an ideal crop for organic, sustainable farming.

*If you want
others to be
happy, practice
compassion. If
you want to be
happy, practice
compassion.*

Hello & Happy Fall!!

How wonderful it is to have cooler days after such a hot summer! Bodies are strange about seasonal temperature changes - they tend to hurt during the transitions. Lymph drainage & relaxing sore muscles can help this phenomenon. Use massage as part of your survival arsenal. And do enjoy the transition into milder weather!

My schedule has become a bit fuller than it was when first I relocated to my office. It is easier to get the times you want if you book early or at the end of your session. Sometimes you can get a same-day appointment, but more often than not lately, this is harder to do. This makes me happy, but may frustrate you! So, gimme a call...

Holidays are approaching, along with shopping, cooking, & school schedules. So take time for yourself & remember to smile! Holidays are a good incentive for diet-exercise so you'll look & feel your best. Drink lots of water & don't forget to s-t-r-e-t-c-h! Simple as it sounds, it really will help! Please ask me if you forgot how! :-)

When shopping for hard-to-buy-for people, remember that I have gift certificates available. They are good for everybody & every occasion.

I look forward to seeing you soon! - Smiles always, Lucy
